MCL-7206	■		■			■		■		■		■		■		■		■		■		■	■	■

PLEASE NOTE: Adjustable waist pant style MCL-7206 adjusts up and down 1" from waist measurement. Expando waist styles MCL-7201 and MCL-7202 expands up to 1".

MEN'S MEASUREMENTS

Specific measurements are only needed for Made-To-Measure garments and selected styles.

Neck: Measure the circumference of the center of the neck. To ensure ease of movement in dress shirts, be certain that two fingers can be placed between the neck and measuring tape.

Sleeve: The arm should be straight, but relaxed, at the side of the body. Start at the bone at the base of the neck that protrudes when you tilt the head forward. Continue across the top of the shoulder and down the outside of the arm to 1" below the wrist bone.

Neck-To-Waist: Start at the bone at the base of the neck that protrudes when you tilt the head forward, and measure straight down the back to the natural waist (Approximately 1" below the navel).

Chest: Measure the circumference of the fullest part of the chest, just under the arms. To ensure ease of movement in suits and jackets, have student inhale deeply, expanding the chest to full capacity, while measuring. Use this measurement to approximate suit jacket size.

Midsection: Measure the circumference of the fullest part of the torso, half way between the diaphragm and the waist.

Waist: Measure the circumference of the natural waist, approximately 1" below the navel. (NOT where they wear their pants today!)

Inseam: Standing barefoot with feet shoulder width apart, measure on the inside of the leg, the distance from the crotch to the floor.

Outseam: Standing barefoot with feet shoulder width apart, measure on the outside of the leg, the distance from the waist to the floor.

NOTE: All measurements should be taken with student standing tall, looking straight ahead, and unless otherwise noted, with feet together.
